SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience in machine learning, data analysis, feature engineering, and model evaluation. Proficient in Python, SQL, Pandas, NumPy, scikit-learn, and XGBoost. Experienced in building predictive models and end-to-end ML pipelines. Seeking an entry-level Data Scientist or Machine Learning Engineer role.

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Data Analysis:** Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning
- **Libraries & Tools:** Pandas, NumPy, scikit-learn, XGBoost, TensorFlow Lite
- **ML Models:** Random Forest, Support Vector Machine (SVM), Logistic Regression
- **Computer Vision:** OpenCV, Image Processing
- **NLP & GenAI:** Natural Language Processing, Generative AI (Basics)
- **Platforms & Tools:** Google Colab, Git
- **Embedded & IoT:** Raspberry Pi, Arduino

WORK EXPERIENCE

Data Science Intern

TheDal.cloud (Remote)

Jan 2025 – Present

- Developed and evaluated 6 machine learning models on real-world datasets.
- Performed data preprocessing, feature engineering, and scaling using Pandas and NumPy.
- Improved model performance through hyperparameter tuning and cross-validation techniques.
- Analyzed results and communicated insights using reports and data visualizations.

ADDITIONAL EXPERIENCE

AI Developer Intern

GyanBridge Technology, Mumbai (Remote)

Oct 2025 – Jan 2026

- Researched, designed, and implemented machine learning algorithms for real-world applications.
- Collected, cleaned, and preprocessed large datasets to improve model training efficiency.
- Trained and fine-tuned AI models to enhance accuracy, performance, and reliability.
- Documented model workflows, experiments, and results for internal knowledge sharing.
- Followed data privacy and confidentiality standards while handling sensitive data.

PROJECTS

Machine Learning Prediction System

- Built an end-to-end machine learning pipeline using Python, Pandas, NumPy, and scikit-learn.
- Implemented Random Forest, SVM, and XGBoost algorithms for prediction tasks.
- Performed feature engineering and hyperparameter tuning to optimize model performance.
- Achieved 92% accuracy and evaluated models using precision, recall, and F1-score.

Graceemo – AI-Based Human Chancellor Robot

- Built an AI-powered Human Chancellor robot with autonomous navigation, visual perception, and voice-based interaction using VSLAM, TensorFlow Lite, and embedded motor control.

GyanBridge (Nebula) – AI-Powered Intelligence Orchestration System

- Built an AI-driven data orchestration and analytics platform featuring intent recognition, multi-source information retrieval, intelligent filtering, and deduplication. Integrated a RAG-based analytics engine for natural language insights, with a Flask backend and React frontend for end-to-end deployment.

LinguistAI – AI-Powered Visual Translator

- Built an AI-driven visual translation system to convert Tamil posters into English while preserving original layout and design using dual-AI processing and image reconstruction techniques.

EDUCATION

Bachelor of Technology-Artificial Intelligence & Data Science
Grace College of Engineering, Thoothukudi | Anna University|
Nov 2022-May 2026

CERTIFICATIONS

- Data Science Internship – Thedal.cloud **(Jan 2025)**
- AI/ML for Geodata Analysis – IIRS **(Aug 2024)**
- Codey Inventor – SP Robotics Works **(May 2022)**

LANGUAGES

- Tamil (Fluent)
 - English (Fluent)
 - Malayalam (Basic)
